Sir:

Applicant respectfully requests correction of the Filing Receipt document.

In the "Assignment for Published Patent Application" section, please correct "Kyst" to read "Naestved", as indicated in the Recordation Form Cover Sheet and Assignment (copies enclsoed) filed in the USPTO on October 4, 2005. We have indicated the correction in red ink on the attached copy of the Filing Receipt.

Applicant respectfully requests the issuance of a corrected Filing Receipt indicating the above-identified correction.

It is believed that no fees are due in connection with this request. However, if any fees are determined to be due, the Commissioner is hereby authorized to charge these fees to the undersigned's Deposit Account No. 50-0206.

Respectfully submitted,

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

Assignment

WHEREAS, I, the undersigned, Frank Skjelmose a citizen of Denmark, residing at Kirsebaervej 32, DK-4700 Naestved DENMARK (hereinafter referred to as the "Assignor"), has made an invention entitled:

AN INSTALLATION FOR MANUFACTURING OF SHAPED ELEMENTS FROM FIBROUS WASTE MATERIAL AND A METHOD OF USING THE SAME

described and/or claimed in:

application for United States Letters Patent No. 10/518,760, filed on December 21, 2004, which is a national stage of PCT/DK2003/000407, filed June 19, 2003, which claimed priority from Denmark application PA 2002 00954, filed June 21, 2002 (collectively, "Applications")

WHEREAS, METANITE A/S (the "Assignee"), having a place of business at Maglemølle 157 DK-4700 Naestved Denmark, desires to acquire the entire right, title and interest in and to the aforesaid invention, the Applications, and any and all improvements and/or modifications to the aforesaid invention and Applications, and in and to any and all patent applications and/or Letters Patent of the United States or any other country related to the invention, the Applications, and/or any and all improvements and/or modifications to the aforesaid invention and Applications, including but not limited to, provisional applications, conversions to utility applications, continuations, continuations-in-part, continuing prosecution applications (CPAs), requests for continuing examination (RCEs), reissues, reexaminations, extensions, substitutes, renewals and divisions which may be filed or granted therefor and all rights to claim priority in whole or in part on the basis of the Applications;

NOW THEREFORE, in consideration of the sum of One Dollar (\$1.00) and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Assignor agrees to sell, assign and transfer, and hereby does sell,

assign and transfer, to Assignee, its successors, legal representatives and assigns, the full and exclusive right, title and interest in and to the aforesaid invention and/or Applications, including any and all improvements and/or modifications to the aforesaid invention and/or Applications, and in and to any and all patent applications and/or Letters Patent of the United States or any other country related to the invention, the Applications, and/or any and all improvements and/or modifications to the aforesaid invention and Applications, including but not limited to, provisional applications, conversions to utility applications, continuations, continuations-in-part, CPAs, RCEs, reissues, reexaminations, extensions, substitutes, renewals and divisions which may be granted therefor and all rights to claim priority in whole or in part on the basis of the Applications or any patent application identified herein.

The Assignor hereby covenants for me and my legal representatives, and agrees with said Assignee, its successors and assigns, that I have the full right to convey the entire interest herein conveyed and that I have granted no right or license to make, use, sell or offer to sell said invention, Applications, any other applications or properties identified herein, to anyone except said Assignee, that prior to the execution of this deed, my right, title and interest in said invention, Applications, or any other applications or properties identified herein had not been otherwise encumbered, and that I have not and will not execute any instrument in conflict with this Assignment.

This Assignment covers all countries of the world and the Assignee is hereby entitled to file applications in any country at its discretion and to abstain from seeking patent protection in any and all countries, if it so desires.

This Assignment also includes my right to claim priority under the Paris Convention or any other multilateral or bilateral treaties.

The Assignor hereby covenants and agrees, on my own behalf and on behalf of my successors and assigns, to execute any additional assignments and other documents required in connection with the prosecution of the Applications or patent applications as well as to perform any additional acts necessary to enable the Assignee or its successors, legal representatives and assigns, to enjoy the full rights of this Assignment, including applying for a patent for the invention in the United States of America or in any other country of the world, and assigning the Applications or any other applications of any other country of the world and any patent or patents issuing thereon to the said Assignee or its successors, legal representatives and assigns.

The Assignor hereby agrees on my own behalf and on behalf of my successors and assigns, without further compensation, to promptly at any time, upon the request of the Assignee, its successors and assigns, fully cooperate with the Assignee with respect to all matters regarding this Assignment in the United States of America or any other country, including without limitation, communicate to Assignee or its representatives any facts known to the Assignor respecting the invention, to execute all provisional, divisional, continuation, continuation-in-part, CPAs, RCEs, reissue, reexamination, extension, substitute, renewal, and any other patent applications for any and all countries of the world, sign all lawful documents and make all rightful oaths and declarations relating to the invention, execute and deliver any and all papers that may be necessary or desirable to perfect the title to this invention in the Assignee, its successors, legal representatives or assigns, and to testify in any judicial or

administrative proceeding and generally do everything possible to aid the Assignee to obtain, maintain and enforce such Letters Patent in the United States or any country of the world when requested so to do by the Assignee.

The Assignor hereby authorizes and requests my agents, Hunton & Williams, 1900 K Street, N.W., Suite 1200, Washington, DC 20006-1109, or an authorized Metanite A/S employee to insert hereon any identification necessary or desirable for recordation of this document, including the filing date and application number of any patent application or patent when known.

The Assignor does hereby authorize and request the Director of the United States Patent and Trademark Office and/or appropriate officials of any country to issue any and all Letters Patent which may be granted upon said United States application(s) or upon any other patent application filed in any country of the world, or upon said improvements and/or modifications or any parts thereof when granted, to said Assignee.
